

About the CME and Workshop:

The department of Biotechnology, BIET Davangere and SSIMS&RC have great pleasure to cordially invite you to the 14th National Conference on "Cytology and Genetics" to be held from 06th to 08th of March 2019.

Cytogenetics has become a routine part of clinical work up, where FISH permits to visualize changes that are too subtle to be detected with standard chromosome analysis. Thus cytogenetics and FISH provide information vital to the diagnosis, prognosis, therapy and monitoring of treatment for variety of chromosome anomalies to variety of cancers.

To enlighten further we have arranged one day CME and Hands on Workshop (Karyotyping) with FISH demonstration technique in the department of Anatomy on 07th March 2019 at SSIMS & RC. We invite you all to participate in large number to acquire recent knowledge of Cytogenetics.
